PROFESSIONAL SUMMARY

Computer Science graduate skilled in building responsive web applications using ReactJS, HTML, CSS, JavaScript, and Bootstrap. Familiar with Python and SQL for backend support. Experienced with Git and GitHub for version control and collaboration. Immediate Joiner.

TECHNICAL SKILLS

Frontend: ReactJS, HTML5, CSS3, JavaScript, Bootstrap

Backend: Python, SQL – MySQL

Version Control: Git, GitHub

EXPERIENCE

Frontend Developer Intern

Oct 2025 – Jan 2026

Vrityfy AI, Hyderabad

- Built website UI from Figma designs using AI-assisted tools, translating mockups into clean, working code.
- Implemented navigation and smooth scrolling for a seamless user experience across all pages.
- Developed fully responsive layouts compatible with all screen sizes and browsers.
- Created reusable components using ReactJS and React Native, reducing code duplication.
- Applied HTML and CSS for structured, styled, and accessible page layouts.
- Used Git and GitHub for code versioning, pushing updates, and participating in code reviews.

PROJECTS

Medicare Hub – Healthcare Appointment Booking Platform

ReactJS, Bootstrap, JavaScript, CSS, REST APIs

- Designed and developed a fully responsive healthcare web application for booking doctor appointments and managing schedules.
- Built modular and reusable UI components including doctor profile cards, appointment forms, and booking dashboards using ReactJS.
- Integrated REST APIs to fetch real-time doctor data, appointment slots, and user details dynamically.
- Implemented smooth page navigation and routing using React Router for a seamless multi-page experience.
- Applied Bootstrap and custom CSS to achieve a clean, mobile-first, and cross-browser compatible layout.
- Optimized component rendering and ensured fast load times through efficient state management and code structure.

Audio-to-Sign Language Translator

Python, JavaScript, Web Speech API, REST APIs

- Developed a real-time web application that captures spoken audio and converts it into corresponding sign language gesture sequences.
- Integrated the Web Speech API to handle live speech recognition and transcription directly in the browser.
- Built an interactive JavaScript-based gesture display module that maps transcribed words to visual sign representations.
- Connected REST APIs for processing and retrieving gesture data, enabling accurate and dynamic sign language output.
- Designed a clean and responsive UI that works smoothly across both desktop and mobile browsers.
- Tested and debugged the application thoroughly to ensure accurate speech detection and consistent gesture rendering.

EDUCATION

B.Tech – Computer Science and Engineering

2025

Annamacharya Institute of Technology and Sciences

CERTIFICATIONS

- Frontend Development Internship – Edzeeta Pvt Ltd
